SUMMARY

Innovative Flutter Developer with 3+ years of experience building high-performance, scalable mobile and web applications for B2B and B2C clients. Skilled in delivering seamless user experiences, optimizing performance, and developing robust backend integrations using Firebase, REST APIs, and modern state management. Adept at working in Agile environments and collaborating with cross-functional teams to deliver impactful digital solutions. Passionate about creating polished, user-focused apps for the UAE market.

PROFESSIONAL EXPERIENCE

Flutter Developer | Nearpay Innovations

Kerala, India | 2024 – Present

- Led development of three cross-platform Flutter apps serving 350K+ users, achieving 50K+ MAU and 1K+ daily transactions.
- Engineered performance improvements through Riverpod/Provider state management and efficient UI rendering.
- Enhanced app reliability and scalability with CI/CD pipelines and automated UI testing.
- Collaborated on Nearwala Application – integrated geolocation, secure payment gateway, real-time Firebase sync, and in-app chat.
- Developed Nearwala Manager App (mobile & desktop) for shop owners to track sales, manage listings, and monitor analytics, featuring secure real-time communication and dashboards.

Flutter Developer | ACELR Tech Labs

Kerala, India | 2023 – 2024

- Built the Placeorder Mobile Application, the first B2B seller app on the ONDC network, transforming digital operations for vendors.
- Designed secure authentication and scalable Firebase/Firestore backend for real-time data management.
- Developed Placeorder Web App using Flutter Web – enabling product listings, sales tracking, and reporting dashboards.
- Collaborated with agile teams to architect and deploy high-impact B2B/B2C products using MVVM architecture and RESTful APIs.

Freelance Mobile Application Developer

Remote | 2021 – 2023

- Delivered high-quality cross-platform apps for clients across education, hospitality, and smart infrastructure sectors.

- Built and deployed the Eduklader App Suite (Teacher, Parent, and Admin apps) integrating real-time notifications and secure authentication.
- Developed a Car Parking Management System and Hotel Management Solution with role-based access and cloud sync.
- Ensured all apps met performance benchmarks and were successfully published to the Play Store.

FULL-STACK DEVELOPER PROGRAM

- Graduated: Feb 2023

BACHELOR OF COMMERCE (B.COM)

- Graduated: May, 2021
-

PROJECT HIGHLIGHTS

Nearwala App Suite

- Comprehensive B2C and management platform with integrated payments, notifications, and analytics.
- Achieved seamless cross-device performance across mobile and desktop.

Placeorder ONDC Seller Platform

- Enabled vendors to onboard and sell via the ONDC network with real-time dashboards and secure authentication.
- Improved operational efficiency for small businesses through intuitive design and automation.

Eduklader Ecosystem

- Built multi-role apps for teachers, parents, and admins with real-time synchronization and user management.
 - Delivered within tight timelines with zero post-deployment critical bugs.
